- Java
- C#
- Python
- SQL
- HTML + CSS + JSX

▶ TECHNOLOGY
- React & React Native
- Redux
- Node.js
- Vue
- Google Cloud Platform
- Android Studio, XCode
- Visual Studio
- Git

▶ SKILLS
- Communication
- Adaptability
- Quick Learner
- Time Management
- Leadership
- Teamwork
- Organized
- Problem Solving

▶ PROFESSIONAL EXPERIENCE

Handimaps — *Seattle, WA*

Lead Software Engineer *(Full Time)*   01/2019 - **Present**
- Trained and supported new hires to maintain and collaborate on native-mobile and web application development.
- Managed team for flagship project while utilizing concepts from Agile and TDD, and performed weekly code review and quality assurance.
- Architected and built full-featured prototypes to act as proof-of-concept presentations for new projects and to pitch to prospective clients with.

Associate Developer (Full Time)   06/2018 - 01/2019
- Acted as an Engineering Communication Bridge between all contacts: designers, front-end developers, management, clients.
- Frequently learned new technologies and tools in order to best adapt to changing specifications and project requirements.
- Developed client-controlled administration web portal for interfacing with our mobile applications and to produce real-time analytical data of app usage on-site

Intern Developer (Internship)   03/2018 - 06/2018
- Built front end prototype features and components for native Android (Java) and iOS (Swift) mobile applications.
- Built internal tools to assist aspects of the physical infrastructure setup, including streamlining setup of data translation into the backend.
- Improved performance and stability of Android and iOS mobile applications by resolving critical bugs both on the frontend and backend.

CoderDojo — *Bellevue, WA*

Tutor (Volunteer)   04/2017 - 06/2017
- Assisted in tutoring children in introductory programming projects using Python, HTML, and Scratch.
- Collaborated with a team of volunteers to strategically plan, develop, and implement more ambitious, exploratory projects and future lesson plans for prospective students.
- Developed interpersonal connections with a multitude of students at different skill levels to help facilitate their growth. Identified assistance opportunities and needs during lessons, answering questions/guiding students whenever necessary.

▶ EDUCATION

University Of Washington

Bachelor of Computer Science and Systems   09/2014-06/2018
Concentration in Database Design and Mobile Development
Minor in Mathematics
